Black Ice Software - March 17, 2015

## Auto-print SDK 14.27 is released!

**Improvements for Merging documents, for Logging, for Profiles and dozens of stability improvements!**

Black Ice Software has released the Auto-print SDK 14.27 including **major improvements** in the Auto-print SDK samples for **merging multiple documents into one document**. To merge documents, the user simply has to select the **Merge to PDF** or **Merge to TIFF** profiles on the Auto-print samples user interface and print!

The latest release of the Auto-print SDK includes **improved logging** to be more specific and useful to track converted documents or troubleshoot the occurring issues. Also, the latest Auto-print SDK includes improvements for Auto-print Service C++ sample to write the important information into the Windows Event Viewer if the log file cannot be opened.

The Auto-print SDK 14.27 includes stability improvements in the Auto-print samples for the Profile selection, improvements in the OCX registration batch files and updated documentation, to enhance the usability and user's experience.

**The complete list of improvements in the latest Black Ice Auto-print SDK include the following:**

## Exclude Me

If you no longer wish to receive this email [please click here](#).
